

Please note that this template is for you to use completely FREE OF CHARGE for your own personal card-making projects. Please do not abuse this service by copying and selling this template.

You can re-scale this template to fit any size card you like. Just remember to always put the long straight bottom line of piece 1 along the bottom of your card.

1. Print the template onto card.
If you want to make a shaped card, trace around the entire outline directly onto the front of your card and cut out. (You could do this on the back too).
2. Cut out each piece in number order.
3. Trace piece 1 onto your chosen card. Flesh, white, gold and silver all work well.
4. Trace all the hat pieces onto your chosen cardstock. I think it looks best if you keep pieces 2 and 3 plain, as these are actually the inside of the hat.
5. Piece 4 of the hat is the brim, and looks really effective when mounted onto 3D foam to raise it up from the rest of the hat.
6. Let your imagination run wild to create some really funky designs! Flowers and feathers would look great, as would magic mesh and metal embellishments. I also think animal print papers would look fabulous.

Have Fun!
